

Entrance Doors

Aluminum and PVC

Quality | Security | Prestige | Comfort

...you will understand the difference.

Tradition of Quality since 1969.

Why UWE-B?

Because UWE-B have been building up their brand since 1969. In that time we have quenched the dreams of our numerous customers in Poland, Europe and worldwide. UWE-B is a renowned manufacturer of windows, doors and curtain walls. We are very proud to have earned the respect of investors in a variety of sectors: residential, commercial, historical restoration, and even the most demanding field of passive and energy efficient construction.

What is the highest quality of products a result of?

The highest quality of our products is achieved by the use of the most up-to-date technologies and continuous investments into R&D. Being one of the few manufacturers in Poland to have successfully introduced modern solutions into the market making us a pioneer of innovation and development within this sector. The quality, safety and comfort of our products are confirmed by numerous prestigious awards and certificates.

Why is UWE offer so comprehensive?

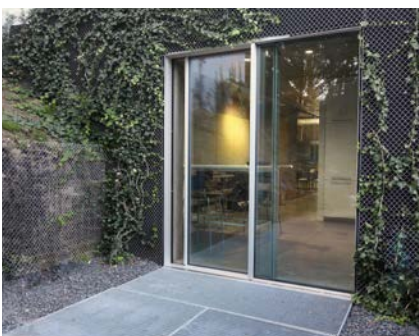

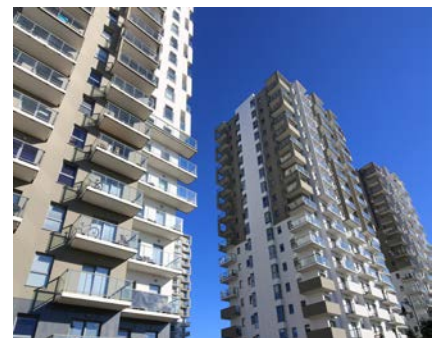

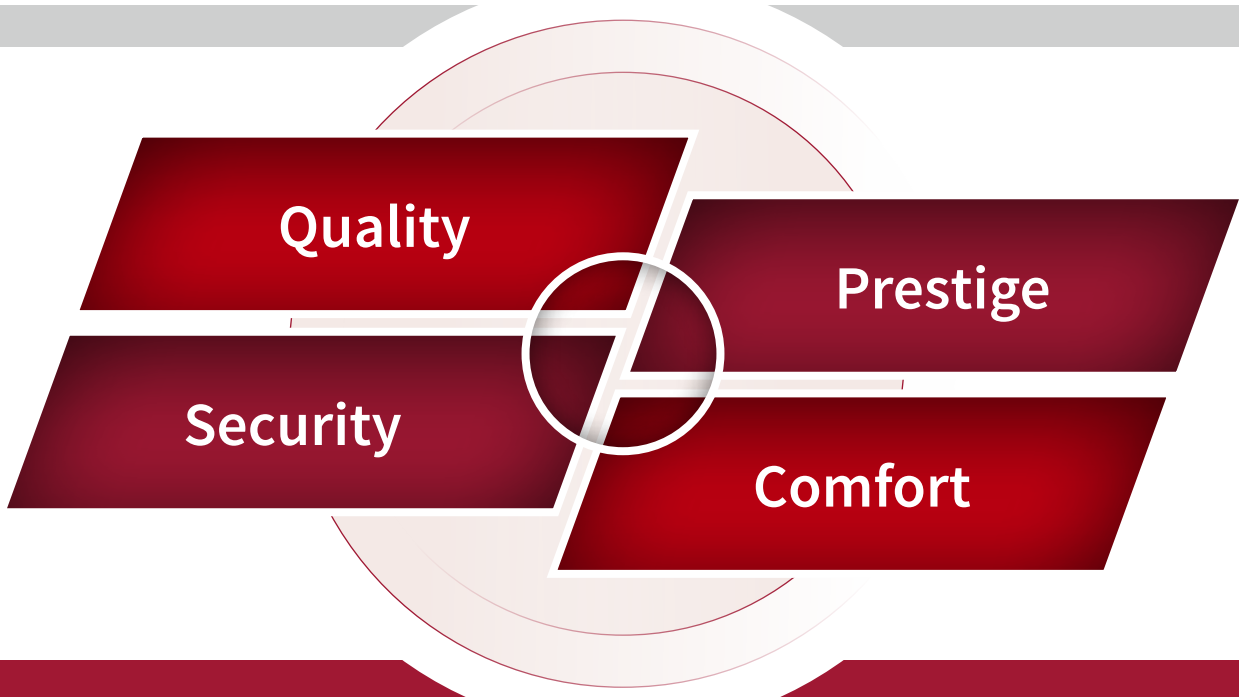

So you don't waste any of your precious time. You can choose from a wide range of materials: PVC systems, variety of timbers ranging from traditional pine to exotic species from around the world, aluminum systems as well as composite systems of PVC-aluminum and timber-aluminum. To complement our range of windows and doors you can choose from a vast spectrum of accessories e.g. roll-er-shutters, venetian blinds, insect screens, shutters, garage doors or even marquises or full glass constructions. We also offer numerous modern control systems e.g. radio, internet or biometrics.

Aluminum Doors. Benefit primarily from a modern design and exceptional resistance to the external elements. Aluminum is a technologically advanced material whose performance is clearly demonstrated by its use for the fabrication of aircraft parts. Production time for aluminum doors is fast so you don't have to wait long for your door. And a wide range of designs allow you to select the door of your dreams.

Alu-Inox applications on the aluminum doors are flush mounted into the surface of the door. Applications and milled grooves are present on the exterior of the door as standard.

PVC doors guarantee a high level of thermal insulation and excellent user comfort. Their high performance insulation is achieved by the incorporation of our Kombi system profiles, whose benefits can also be appreciated in our corresponding window systems. The PVC doors presented are the most sensible choice for people looking for a comfortable solution at an exceptional price.

Alu-Inox applications on the PVC doors are surface mounted (raised above the surface of the door). Applications are on both sides of the door.

Glass door leaves

Glass door leaves with timber frames are a best seller of Bertrand's. Modern designs lead to this being an ever more popular product in our extensive range. These doors are formed by combining dedicated fittings manufactured by the specialist company Dorma and toughened safety glass. We offer a wide range of glass designs. Frames can be manufactured from a wide range of timber species.
